

Reliable. Simple. Life-saving

**NO ONE SHOULD BE LEFT BEHIND
BECAUSE EVERY LIFE MATTER.**

SAFETY-FIRST DESIGN

Engineered with advanced safety features, our products ensure secure and controlled evacuation in critical situations, minimizing risk for both the user and the responder.

DURABLE & RELIABLE BUILD

Built with high-quality, fire-retardant materials, our products offer long-lasting performance and reliability even in the most demanding environments.

EASY ONE-PERSON OPERATION

Designed for simplicity, our solutions allow a single responder to assist safely and efficiently, making emergency evacuation quicker and more manageable.

VERSATILE FOR ALL FACILITIES

Ideal for hospitals, offices, malls, and public buildings, our evacuation solutions are adaptable to various spaces and emergency needs.

LIFELINE EQUIPMENTS

Lifeline Equipments is dedicated to developing life-saving evacuation solutions for modern buildings.

With decades of experience in life safety, we specialize in evacuation equipment designed to safely evacuate individuals down staircases when elevators are unavailable during emergencies.

MISSION

To provide reliable evacuation solutions that enable safe, efficient, and accessible stairway evacuation during fires, power failures, and building emergencies.

To create a future where every building is equipped with trusted evacuation systems that ensure safe mobility and emergency evacuation for everyone.

VISION

MANUAL EVACUATION CHAIR – LEC-PRO500

- › High-strength aluminum alloy frame with hardened surface coating
- › Designed for hospital emergencies, rescue operations & ambulances
- › Unique crawler structure enables smooth stair descent
- › Operated easily by a single person
- › Adjustable height for patient comfort
- › Reduces physical strain on operator

Aerospace-grade Aluminum (6061)

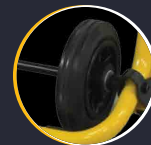

Fire-retardant dust cover

WHY CHOOSE US!

1. Trusted by Hospitals
2. Easy to Use
3. Advanced Safety Features
4. Durable Build
5. Reliable in Emergencies

4-Speed Control Interface

Adjustable Stair Tracks

ADVANCED MODEL

POWER EVACUATION CHAIR – LEC-XT1000

Engineered for advanced emergency response, this powered chair ensures smooth, controlled, and efficient patient transport across stairs and surfaces.

- › 200W high-performance brushless motor
- › Large-capacity lithium battery for extended operation
- › Adjustable 3-speed control for ascent and descent
- › Stable and controlled stair-climbing mechanism
